1.3.1 Descript	ion of the courses which addresses Gender, Environment and	sustainability, Human values
Course Code	Name of the Course	Description
AF-5031	Indian Accounting Standards and Corporate Reporting	The course aims at details about fundamentals of accounting standards and corporate reporting
AF-5032	Advanced Accounting	This course helps the students in developing expert knowledge in the context of amalgamation and reconstruction, which aids understanding business environment.
AF-5033	Corporate Tax Planning and GST	The course strives to educate students about GST Laws, tax management and coroporate tax structures so as to estimate the current situation of the market and look ahead for progressive steps for the organizations.
AF-5034	Security Analysis and Portfolio Management	This course enables students to determine value of shares using different approaches as well as explaining various behavioural biases, this focuses on environment and sustainability.
AF-5035	Financial Institutions and Markets	The course aims at providing insights on financial markets and system in India. The various banking systems and their operations. It looks towards sustainable growth of a nation by creating awareness about the direction of monetary flow and its advantages.
AF-5036	Risk Management and Derivatives	This course develops understanding of financial derivatives, analyse various options trading strategies and critically examine various innovations in derivatives market, which throws light on financial market and sustainability.
BC/EC-4008	Basic Econometrics	The course helps the students to understand the use of various techniques of econometrics in research and statistical problems and impart knowledge on self exploration, decision making and problem solving. Such tools and techniques helps an organization to excel in the field of research and become innovative to cater the needs of society/organization.
BI-5031	Bank Management and Fin Tech	The course covers indepth knowledge on fintech, capital and portfolio-management so as to make students aware about various pay technologies and digital mode of transction to create a sustainabl and progressive economy.
BI-5032	Financial Regulatory Framework	This course help students to understand the legal framework relating to banks, insurance and market which directly or indirectly focuses on human values.
BI-5033	Treasury, Investment and Risk Management	The course covers various treasury operation management, risk analysis related to corporate restructring for sustainable organizational growth.
BI-5034	E-Business	This course help students to learn about E-business in India, mobile commerce and social commerce. This throws light on environment and sustainability.
BI-5035	Business Information System	This course helps students to gain knowledge about the professional ethics and responsibility while using IT in organizations, which aids them to sustain in a business environment in the long-run.
BI-5036	ERP for Business	This course make students acquaint with the ERP system in an organization and different factors i related to it. It also focuses on how ERP supports organisation in long-term and create favourable and sustainable business environment.
DA-4092	Data Analytics	The course attempts to educate students about computer applications and its related functions for data analysis. Application of various data processes to make effective managerial decision making. It provides an understanding of computers, computer operating system, and application of relevant software in managerial decision making and problem solving.
EA-5031	Industrial Economics-I	The objective of the course is to help the students to understand the concept and scope of industria economics, different industrial location theories, market structures, concentration and market performance with knowledge on self exploration, decision making and problem solving.
EA-5032	Industrial Economics-II	The objective of the course is to help the students to understand the concept and scope of industria economics, different industrial location theories, market structures, concentration and market performance with knowledge on self exploration, decision making and problem solving.
EA-5033	Agricultural Economics-I	The objective is to make the students familiar with the role of agriculture in economic development, agricultural price policy and impact of new economic policy on agriculture with knowledge on self exploration, decision making and problem solving.
EA-5034	Agricultural Economics-II	The objective is to make the students familiar with the role of agriculture in economic development, agricultural price policy and impact of new economic policy on agriculture with knowledge on self exploration, decision making and problem solving.
EA-5035	Financial Institutions and Markets-I	This course aims at enabling the students to understand the structure, organisation and workings of financial markets, instruments and its intermediaries most particularly the institutions in India. It enhances the capacity of the financial system to pool domestic savings and foreign capital in funding investment and consumption, and at enabling efficient risk-sharing.
EA-5036	Financial Institutions and Markets-II	This course aims at enabling the students to understand the structure, organisation and workings of financial markets, instruments and its intermediaries most particularly the institutions in India. It enhances the capacity of the financial system to pool domestic savings and foreign capital in funding investment and consumption, and at enabling efficient risk-sharing.
EB-5031	Economics of Environment-I	This course is designed with the objective to help a student to understand issues of externalities, sustainable development and various environmental policies and issues and to explore the various socio-economic possibilities to reduce pollution and uplift the standard of living of the people. It imparts knowledge on self exploration, sustainability, decision making and problem solving.
EB-5032	Economics of Environment-II	This course is designed with the objective to help the students to understand issues of externalities, sustainable development and various environmental policies and issues and to explore the various socio-economic possibilities to reduce pollution and uplift the standard of living of the people. It imparts knowledge of sustainability, decision making and problem solving.
EB-5033	Mathematical Economics-I	The objective of the course is to enable the students to understand the techniques of mathematical and statistical analysis which are commonly applied to understand and analyse economic concepts with critical thinking and problem solving.
EB-5034	Mathematical Economics-II	The objective of the course is to enable the students to understand the techniques of mathematical and statistical analysis which are commonly applied to understand and analyse economic concepts with critical thinking and problem solving.
EB-5035	Computer Applications for Economic Analysis-I	The objective of the course is to enable the students to understand the techniques of mathematical and statistical analysis which are commonly complied to understand and analyse economic concepts with sustainability.
EB-5036	Computer Applications for Economic Analysis-II	The objective of the course is to enable the students to understand the techniques of mathematical and statistical analysis which are commonly complied to understand and analyse economic concepts with Sustainability and Human values.

EC-4001	Microeconomic Analysis-I	The course is designed with the basic principles of microeconomic theory and enables them to learn the basic concepts that economists use to understand demand analysis, production function and price and output determination under different market structures The course illustrates how microeconomic concepts can be applied to analyze real-life situations and impart knowledge on self exploration, decision making and problem solving.
EC-4002	Microeconomic Analysis-II	To analyse how individual decision-makers, both consumers and producers, behave in a variety of economic environments and learn to achieve stable and sustainable economic growth.
EC-4003	Macroeconomic Analysis-I	This course has been designed with the objective to familiarize the students with the concepts and issues in modern macroeconomics, as is applied in theory and practice across the world. Seminar on selected topics.
EC-4004	Macroeconomic Analysis-II	This course has been designed with the objective to know price stability, economic growth, income inequality, balance of payments, unemployment, and economic development. Focus on maximize the standard of living and achieve stable & sustainable economic growth.
EC-4005	Quantitative Methods	The course is designed to enable the students to understand the techniques of mathematical and statistical analysis which are commonly applied to understand and analyse economic concepts. It imparts practical knowledge on the techniques of mathematical and statistical analysis with human values.
MC/EC/GO-4	O Social Research Methods	To infuse the idea of understanding the environment through social research employing the moralities for driving into the findings accurately. It helps in Gender and and Human Values.
EC-4007	International Economics	To foster in the students the concepts, ideas and an understanding of the broad principles of international trade and examine the impact of the trade policies followed at the national and international levels as also their welfare implications for the economies with sustainability.
EC-4009	Economics of Growth and Development	To help the students to understand the working of developing economies. Be familiar with models of development and development strategies. Understand decision making and self exploration regarding choice of technology and choice of scale and various criteria for investment.
EC-5001	Public Economics	To familiarize the students with the basic principles of public revenue, public expenditure, public debt, budget and fiscal policy and monetary policy. This course provides a framework for thinking about whether or not the government should participate in economic markets and to what extent it should do so which is applicable for Sustainability and human values.
EC-5002	Economics of Social Sector	The objective is to help in understanding the role of human capital, especially of education and health in economic development. It focuses on dealing with social and economic activities carried out for the purposes of benefiting society.
EC-5003	Odisha Economy	This course is to help the students to understand Odisha economic problems in the light of relevant economic issues and in a comparative perspective. It presents the challenges, opportunities and performance of different sectors of the State's economy that impart knowledge on self exploration, decision making and problem solving.
EC-5004	Indian Economic Policy	Develop a knowledge and understanding of Indian economic problems in the light of relevant economic theories and in a comparative perspective. It focuses on rapid economic growth, full employment, human development and decent work, stability of prices and exchange rate, maintenance of fair competition and avoidance of cyclical fluctuations. It enhances human values, decision making, sustanalibility & problem solving skills.
MC/EC/GO-5	Fieldwork and Dissertation	Fieldwork: Each student have to undergo training for learning and use of different techniques of scientific data collection during 15 days of fieldwork under the supervision of a teacher, as nominated by the head of the department, in a tribal/rural area. To induce hands-on experience by virtue of the project done on the field based problem with inculcating self exploration, decision making and problem solving.
GO-4001	Geomorphology	The course is to familiarize the students with the fundamental concepts of geomorphology. The course explores the earth's movement and different geomorphic processes. It also discusses the theories and techniques related to geomorphology including different geomorphic models. The course focuses on the evolution and development of river valleys. Emphasis is given to applied geomorphology. It helps in Environment and Sustainability.
GO-4002	Geospatial Technology	This course includes Geographic Information System (GIS), Remote Sensing (RS) and Global Positioning System (GPS) that may be used to reveal spatial patterns that are embedded in large volumes of data that may not be accessed collectively or mapped otherwise. It helps in Environment and Sustainability and Human Values.
GO-4003	Climatology	The constituents of the atmosphere, the dynamic nature of the processes associated with it and their contribution in making the earth habitable. The course content also leads to the identification of climatic differentiation on the earth, and the consequences of human activities on the atmospheric processes. It helps in Gender, Environment and Sustainability and Human Values.
GO-4004	Environment and Ecology	The course aims to provide student with the basics of the Geography of the Environment. The different processes of development and adaptation triggered by the environmental prerogatives in the distinct regions of the world to be provided by an interdisciplinary approach to the geohistorical and physical geographical research. The course allows the student to develop an interdisciplinary dialogue with other areas of humanistic and scientific culture. The course also let the students get familiarized with ecological theory and its applications. It helps in Environment and Sustainability and Human Values.
GO-4005	Human and Economic Geography	This course are to acquaint the students with the nature of man-environment relationship and human capability to adopt and modify the environment under its varied conditions from primitive life style to the modern living; to identify and understand environment and population in terms of their quality and spatial distribution pattern and to comprehend the contemporary issues facing the global community. The basic economy of the world is undergoing rapid transformation in recent times. The process of such transformation of economic activities from primary to secondary and tertiary stage is dynamic in nature. In view of this, the objectives of this course are to integrate the various factors of economic development and to acquaint the students about this dynamic aspect of economic geography. It helps in Gender, Environment and Sustainability and Human Values.

GO-4007	Oceanography, and Hydrology	To prepare teach and train students, who are able to creatively apply the knowledge for the marine environment and coastal management. Cultivate specialists in the study fields and branches of physical geography, who acquired the necessary amount of knowledge and motivation to work in accordance with their qualifications, and continue their education or training further. To provide the knowledge and skills necessary for shaping environmental science and environmental protection-oriented thinking paradigm. Develop a critical approach and a sense of civil liability for the Earth and for one's own community and the country. It helps in Environment and Sustainability and Human Values.
GO-4008	Geography of India with special reference to Odisha	This course on the Geography of India assumes' that the students are familiar with the basic landforms, climate, soil, vegetation and population characteristics of India. It is a course designed to enable students to broaden and deepen their understanding of India. It helps in Gender, Environment and Sustainability.
GO-4091	Quantitative Techniques and Applications	Students are exposed to the use of quantitative and qualitative techniques in geographical analysis including sampling, inferential statistics and analysis of special data. This course enables the students to learn more about how to use numbers and data within geography. It provides training in practical and analytical skills, which enhance students' career prospects and provide with a strong platform for postgraduate study. It helps in Human Values.
GO-5002	Natural Hazards and Disaster Management	The course is intended to provide a general concept in the dimensions of natural hazards and disasters which are beyond the human control as well as the natural hazards and disasters induced by human activities with emphasis on disaster preparedness, response and recovery. The students specifically understands the natural hazards and disasters and consequent vulnerabilities faced by people across India. To know the resilience mechanisms (both traditional as well as statefacilitated) adopted by the people to cope with the situation. It helps in Gender, Environment and Sustainability.
GO-5003	Tribal Demography	The objective of the course is to make the students gain understanding on the demographic dynamics of indigenous people in India. The students enables to get to know about the distribution of Indian tribes as well as the composition and characteristics tribal population. It helps in Gender, Environment, Sustainability and Human Values.
GO-5004	Geographical Thought	Introduce the discipline geography and its theoretical development over time. Present contemporary and post-modern perspectives, along with the models that act as a guiding force of the discipline. It helps in Gender and Human Values.
GO-5091	Cartography and Geoinformatics (Practical)	In view of the wider application of cartographic tools and techniques in all geographical analysis, this special paper is introduced to provide requisite knowledge and skills in cartography. Students should be able to grasp Remote Sensing methodologies including sensors, platforms and data products from USA, ESA and India. Students also understands the integration of RS with GIS and GPS data. It helps in Sustainability.
GT -5031	Geography of Indian Tribes	After having completed this course, the students able to get a panoramic view of the Indian tribes; understand the geographical attributes that are responsible for the spatial distribution of tribes across the world and in India. The students also learn different geographical and non-geographical factors behind the distribution of tribes, how geography plays an influential role in their habitats. The course discusses the geo-politics that involves tribal societies and the state of tribal people living in urban settings. It helps in Gender, Environment and Sustainability and Human Values.
GT -5033	Tribal Development Policies and Programmes in India	The course enables the students to aware of policies and programmes made for tribes. They understands the tribal and indigenous prospective and responsibilities to study schemes, policies and programmes undertaken by the government of India for overall growth and development of tribal community. It helps in Environment and Sustainability and Human Values.
GT -5034	Geography of Health and Wellbeing of Tribes	This course enable students to get a panoramic view of the Indian tribes; understand the geographical attributes that are responsible for the spatial distribution of tribes across the world and in India. The students learn different geographical and non-geographical factors behind the distribution of tribes, how geography plays an influential role in their habitats. The course discusses the geo-politics that involves tribal societies and the state of tribal people living in urban settings. The course learning objective of this course is to acquaint the students with the perspectives on tribal health, health risks among the tribals, prospective diseases among tribals, and how climate change has its impact on the health and wellbeing of tribal people. It helps in Gender, Environment and Sustainability and Human Values.
GT -5035	Regional Planning and Tribal Development	This course enables the students to develop their understanding planning, strategies, programmes and problems of tribal area. They understand tribal and indigenous prospective and responsibilities natural resource managers. They get to know about the significance and procedure Tribal Society, culture and Issues in Development, Skills for Tribal Development Facilitators, Tribal Development Facilitators as an action Researcher, Tribal Development Policies, programmes and Governance, Tribal livelihood Intervention, Natural Resource Management and Tribal Sustainable Management. The course allows them to know tribal rights and entitlements. Students can get a clear picture of Institutional support for Development and marketing of tribal products and minor forest produce by ministry of Tribal Affairs. It helps in Gender, Environment and Sustainability and Human Values.
GT -5036	Geography of Tribal Tourism	This course is to facilitate the students to understand how geographical factors are affecting, influencing and shaping tribal tourism in India. It helps in Gender, Environment and Sustainability and Human Values.
GT-5032	Intervention, Preservation and Management of Tribal Resources	The course enables the students to develop and refine their understanding of tribal and Indigenous Natural Resources Management. They understands tribal and indigenous prospects and the responsibilities of natural resource managers. Students can get a clear picture of Institutional support for the Development and marketing of tribal products, and minor forests produce by the ministry of Tribal Affairs. It helps in Gender, Environment and Sustainability and Human Values.
IP-5081	Summer Internship Programme	The course provides students an opportunity to gain practical knowledge on various topics. Application of theoritical knowledge in real life. The course aims at growth, progress and preparing the students to become proactive learners and innovative producers in their respective fields. It imparts knowledge on self exploration, decision making and problem solving.

MC-4001	Management Practices and Organizational Behavior	The course covers topics on conflict resolution, qualities like: leadership, motivation that helps in maintaining a conducive and sustainable environment for the growth of the organization. Topics like attitude, perception, personality are important for positive and progressive human values.
MC-4002	Financial Management and Policy	The course strives to educate students about various financial tools, techniques and decision making which is the key to sustiable growth of an organization. It also provides insight about roles and duties of a finance manager.
MC-4003	Accounting For Managerial Decision Making	The course provides indepth knowledge on accounting statements, various analysis techniques which can be a major prospect for sustainable growth of an organization.
MC-4004	CSR, Business Ethics and Corporate Governance	The course educates students about role of corporations, developing and managing CSR activities for stable growth of the organization. It relates to values and ethics related to business and people.
MC-4005	Legal Aspects of Business	The course provides knowledge on the legal aspects of business along with the various rights and duties of an employer for maintaining values and ethics at work. It also aims towards innovation and preservation through IPR, Patents and copyrights for the sustainable progress of an organization.
MC-4007	Statistics For Decision Making	The course provides detailed information on application of various statistical tools which helps in major decision making and strong research foundation of the organization.
MC-4009	Managerial Economics	The course provides information about production theories, market forms to lead the organization in difficult times.
MC-5001	Dynamics of Banking and Insurance	The course covers regulations and operations related to banks, financial institutions and insurance. The banking system is a strong link between economy and society which may lead to progressive citizens and community.
MC-5002	International Business and Procedure	The course help students in analysing the dimensions of international trade, appreciating the role of trade theories in explaining trade patterns and understanding the political realities of international trade, that focuses on environment as a whole.
MC-5003	Advanced Auditing	The course covers current audit practices and procedures of organization. Various auditing strategies and programming. Audit report preparation, roles and duties of Auditor General of India. Ultimately it aims towards the growth and progress of the organizations.
MC-5004	Strategic Human Resource Management	This course outlays the importance of Human Resource Management, concept of strategy formulation and implementation, concept of performance evaluation, which contributes to human values and sustainability.
MH-5031	Consumer Behaviour	The course aims at covering various aspects of consumers like behaviour, decision making and cultural determinants. To understand the human mind-set as consumers and how this behaviour impacts the sustainable growth of organizations
MH-5032	Customer Relationship Management	This course helps students to develop the skill and implement CRM in business, which aids in distinguishing various customers. Thus it focuses on gender, human values, environment and sustainability.
MH-5033	Digital Marketing	The course covers the impact of IT and ICT on marketing. The various marketing techniques for the sustainable growth and progress of organizations in this technological era.
MH-5034	Logistics and Supply Chain Management	the sustainable growth and progress of organizations in this technological era. Student develops an understanding of performance measurement, supply chain metrics (KPIs), balanced score card approach and bench marking, that helps them to sustain in a business environment.
MH-5035	Human Resource Planning and Development	The course aims at creating potential manpower for the organization. The techniques of HRP, competency mapping and job analysis so that to make organizations more sustainable and competetive in today's world.
MH-5036	Performance and Compensation Management	Student understands performance appraisal and its methods, the major challenges of the compensation committee and related regulations, performance based plans, conceptual issues, compensation risk, that focuses on human values and sustainability.
MO-5021	MOOCs-Human Values and Professional Ethics	The course covers ethical and professional aspect of human being in social and organizational set- up. Provides insights about equality, justice and rights of human being in various environment. To allow the pupils to captivate and adopt values, moral behavior in one's own and professional lives. It helps in Gender and Human Values.
TR-4051	Natural Resource Management	The course helps students to understand the importance of the concepts like; conservation, preservation and sustainability of land, air and water. The course is a source of awarness towards SDG goals, acts and ethics for enviornmental sustainability. Students are exposed to Environmental protection Act, Environmental Ethics and Environmental Valuation. They also learn different International and national efforts taken for the conservation and preservation of natural resource management. It helps in Gender, Environment and Sustainability and Human Values.
TR-4052	Sustainable Tribal Development	The course aims to educate students about the meaning of Sustainablity. Also about the SDG and MDG goals. Implementation of this course aims towards gender equality, growth, progress and sustainablity of organizations and society at large.
TR-4094	Learning Through Academic Excursion	The course provides extensive knowledge on tribal community, languages, documentaries and culture of indegenous community which helps towards rise and sustainable growth of these communities.
TR-5051	Tribal Entrepreneurship Development	The course foster in the students the concepts, ideas and knowledge of building blocks for entrepreneurship skills required for setting up business, utilizing the natural resources with practical approach of start up policy. By making them aware of various types of enterprises, government schemes and policies.
TR-5052	Rural Marketing and Tribal Development	This course aims to make students critically analyse the relevant factors resulting into better distribution decisions and market expansion of tribal and rural products, which contributes to the environment and sustainability.
TR-5053	Tribal Economy and Livelihood	The course covers details about distribution of rural economy. The management, dimensions and issues of tribal community to recognise and preserve the rural heritage. It puts light on the ethics, values and sustainablity modes of indegenous community.
UR -5031	Urban Planning	The objective of this course is to provide opportunity to the learners to deepen their knowledge and understanding of urban planning process. The students get clear understanding on various theoretical and practical aspects of urban planning. They gain knowledge and skills in formulation, implementation, monitoring and evaluation of urban development programmes. It helps in Gender, Sustainability and Human Values.

SW-5032	NGO Management	The course enhances the skills of student regarding the basic concept of NGO management and enable to appreciate the role of management. The students get to know about Sustainable Development, Strategic Management and Planning, Operational Planning, Communication, Leadership, Fundraising and the registration process of NGOs.
SE-5032	Social Policy and Social Legislation	This course aims at having knowledge on the concepts related to law, fundamental rights, removal of discrimination to promote equality and social security in the society. To promote and protect the rights of socioeconomically disadvantage group by implimenting constitutional safeguards.
SW-5034	Social Work with Family and Child Welfare	The course comprises concepts and stages of family, and marriage, theories on family and on issues and challenges encountered by women and children along with information related to different welfare measures and policies. Students learn to address issues related to gender and human values with this paper.
SE-5034	Social work with Individual and Group	This paper equips the students with the knowledge based kill and technical knowledge used by social workers in different perspectives of individual and group. The students will learn different humanitarian values.
SW-5040	Introduction to Social Work Practices	This paper facilitate the students to have basic knowledge on social work practices and its scopes and to acquaint them with methods, functions, process and application domains of social work; to make the students familiar with tactical knowledge for working with child, youth, and families in different service setups.
SW-5082	Field work and Dissertation	The course is a practical approach of the students for on spot learning and gaining hands-on experience of application of different social work methods, principles and theories having connotation to human values, gender and environment and sustainability
AN-4001	Fundamentals of Social and Cultural Anthropology	The course explain the nature and organization of culture and society at various levels and it helps to understant the basic categories that have emerged due to the comparison of groups and institutions in a global context.
AN-4003	Fundamentals of Biological Anthropology	The course helps to understand the four forces of evolution and elaborating about the biological basis for life, adaptation, primate anatomy and behaviour, hominid origins, and the adaptive significance development of evolutionary theories and the major milestones of human evolution and human variation.
AN-4005	Fundamentals of Archaeological Anthropology	The course explaines about past humans and cultures through material remains. Students learn to suspend judgment, seek evidence, understand change, compare and contrast information, and learn how to make connections and think outside the box.
AN-4007	Indian Society and Social Change	This course explains, humans interaction, relationships, behavior patterns, and cultural norms and how it has changed over time. Students understant how these changes ultimately alter cultural and social institutions, concepts and rules, which will inevitably affect society in the long run.
AN-4091	Practical in Archaeological Anthropology	This course help students to identify, draw and describe prehistoric tool typology & Describe the students to get idea about conservation and preservation of different museum specimens.
TS-4051	Understanding Tribal Society	This course help learners to understand the tribal way of life in India including their culture, tradition as well as changes in their life.
AN-4002	Thoughts and Theories in Anthropology	The central focus of this paper is to orient students about the theories of Anthropology as they are the analytical tools for understanding, explaining, and making predictions about a given subject matter. It will also help the students to direct our thinking and provide a common framework from which people can work.
AN-4004	Applied Biological Anthropology	This course enhances the professional skills of the students by awaring them about the use of biological anthropology in society for human development, rather than only as an academic discipline.
AN-4006	Ecological Anthropology	Students in this course will able to extrapolate the ways that a population shapes its environment and the subsequent manners in which these relations form the population's social, economic, and political life.
AN-4008	Research Methodology	This course enables students about the specific procedures or techniques used to identify, select, process, and analyze information about a topic. This paper also allows the students to critically evaluate a study's overall validity and reliability.
AN-4092	Practical in Biological Anthropology	In this course, the students will experience practically the methods of examining human physiology and anatomical structure as well as gather skills about identifying diseases or malfunctions occurred in human body.
TS-4052	Tribal Customary Law and Social Justice	This course will enable the students about the customs of tribes handed over from one generation to the next and the rules, norms, reguations and punishments being adopted in them continually and uniformly.
TS-4054	Tribal Administration and PRIs	Students in this course will develop professional skills in assessing the roles of different schemes comprising economic, educational and social development through institution building that are administered by the Ministry and Government.
AN-5001	Anthropology of Health	This course focuses on imparting knowledge and practical skills for betterment of health conditions of human beings by studing relationships between cultural and social values, people's beliefs about cause, course, cure and prevention of diseases.
AN-5003	Population Anthropology	This course extrapolates the demographic characteristics of a living or past population by focusing explicitly on the application of demographic data to address questions of an evolutionary, ecological, or cultural nature. Population Anthropology also highlights the rates and levels of mortality, fertility, and migration and how these all interact to produce population growth (or decline), density, and age- and sex-structures across time and space.
AN-5031	A1. Anthropology of Childhood and Children	To give an analysis about childhood and the different roles and expectations placed on children according to their cultural and environmental background is the primary focus of this paper. Additionally, the course also highlights the heterogeneous nature of childhood and the impact that gender, age, birth order, and ethnicity have on children's experiences and daily lives.
AN-5033	A2. Anthropology of Communication	It highlights to extrapolate the language as asystem of human communication and to assess its socio- cultural practices among the human societies over time and space.
BA-5031	B1. Human Biology an Evolutionary Perspective	This course will acquain the students about human origin and its growth backing by conceptual clarification of evolutionary theories of human being.
BA-5033	B2. Human Molecular Genetics	This course will develop Professional skills among students by obtaining high quality studies related to human molecular genetic disease mechanisms from the analysis of mutated genes and disease susceptibility through to therapeutics.
AA-5031	C1. Principles and Methods in Prehistoric Archaeology	This course will introduce the students the subject of archaeology and its relationship with different chronological divisions of prehistoric times with a brief description about environment, geochronology, weathering and ethno-archaeology.
AA-5033	C2. Prehistoric Archaeology and Palaeo-anthropology of Africa and Europe	This paper targets at capacity building among the students dealing with prehistoric aracheological studies, findings and research activities in two important geographical conditions, i.e., in Europe and Africa.
TS-5051	Scheduled Tribes and Constitutional Safeguard	This course enhances the skills of students to assess ensuring special care for the educational and economic interests of the weaker sections of the society and in particular, of the Scheduled Tribes and shall protect them from social injustice and all forms of exploitations.
TS-5053	Tribal Movies and Tribal Museum	This paper focuses on creating awareness among the students about the values of tribal museums and digital platforms to get acquianted with culture, custom, tradition and tenets of tribal people as well as preserving them future generations.
TS-5081	Internship	This course enable students to acquire practical knowledge and to act professionally in the fields of development, planning, project implementation, academic improvement and research.

AN-5002	Anthropology in Public Sphere	This course enrich to the students about gender, Environment, sustainability, Human values and ethical
	1 00 1	issues in public sphere. Indegenous knowledge with ethnomedicinal practices among the various communities educate the society
AN-5032	A3. Ethno-medicine and Indigenous knowledge	to protect nature with environmental sustainability. This course focused on professional ethics & human values to know about diverse methologies which are
AN-5094	A4. Practical methods in Social and Cultural Anthropology	This course enrich the students to know about diverse methologies which are practiced in through fieldwork in Anthropological research. This course enrich the students to know about human values and gender sensibility to handle human
BA-5032	B3. Human Population Genetics	diversities espescially to study population genetics.
BA-5094	B4. Practical in Human Genetics and Bio-Statistics	In this course, the students will experience practically the methods of examining human genetics and biostatistics as well as gather skills about professional ethics in the laboratories.
AA-5032	C3. Archaeological Anthropology in India and South-East Asia	To protect various acrchaeological sites, this course will enable the students with environment & sustainability of prehitoric cultures of India.
AA-5094	C4. Practical in Field Techniques and Methods in Prehistoric Archaeology	Getting practical knowledge for the identification, preservation and conservation of antiquities and museum specimens in different archaeological sites, this course highly enrich the students with human values & suatainability.
TS-5052	Development, Tribal Displacement and Rehabilitation	This course highly emphasize the students to ennumerate with human values & professional ethics related to development, displacement and rehabilitation issues in tribal and rural pockets.

It gives hand on experience to create traditional embroidered samples.
HS-4002	Textile and clothing	The course is based on systematic dissemination of textile science information followed by practical experiments for the students in the areas of identification of identification and properties, dyeing, printing and finishing treatments of textiles. This knowledge will be base for "Textile designing", "Garment technology", Fashion designing", "Interior designing courses.
HS-4004	Family sociology	The course prepares students for an understanding of contemporary interpersonal relationships in families and in society, from a psycho-social perspective. It includes a focus on concepts and theories of family sociology
HS-4006	Research methodology	Social science research allows scholars to make sense of the social world. The main purpose of this paper is to provide you with a broad introduction to the methodological foundations and tools to study mass communication. This course offers an overview of research methodology including basic concepts employed in quantitative and qualitative research methods. It includes computer applications for research.
		The focus of this course is to examine the role of the dietician/nutritionist in identifying health and nutrition problems and integrating nutritional services with medical and social services within the community. Social science research allows scholars to make sense of the social world. The main purpose of this paper is to provide you with a broad introduction to the methodological foundations
HS-4008	Applied Home science	and tools to study mass communication. This knowledge will be base for "Textile designing", "Garment technology", "Fashion designing", "Interior designing" courses. The course prepares students for an understanding of contemporary interpersonal relationships in families and in society, from a psycho-social perspective. It includes a focus on concepts and theories of family sociology. The research methodology provides the broad introduction to the methodological foundations and it includes computer applications for research. This course offers an overview of research methodology including basic concepts employed in quantitative and qualitative research methods. The community nutrition helps in assessment of issues and national and state community nutrition programs, determinants of health outcomes, measurement of nutrition and health status. and management of community programs
TH-4052	Social psychology among tribals	It helps student infer about different aspects of social world, self, Identity. It orients students towards cognitive aspects of social thought. Its present students with perspectives of perception of the social world. It makes students aware of the various factors related to the formation and manifestation of attitudes.
HS-5001	Institutional management	Course investigates how nutrition requirements and challenges change throughout the human lifecycle and how alteration in nutritional requirements impact on human health and human life. A study of food safety, hygiene and sanitary practices and food management is the ultimate goal of all families. This course prepares the students to use advanced knowledge about food and nutrition for
HS-5031	Theraputic nutrition	prevention as well as treatment of diseases and also maintain human health. Dietetics focuses on food management through proper planning, preparation, monitoring, implementation and supervision of a patient's modified diet and to develop basic counselling skills as dietitian
SC03.2H	Advanced human development	It then moves on to discuss the various schools of thought that gave rise to different theoretical frameworks to understand human development. It explains developmental principles and factors like heredity and environment which influence growth and development. It deals with development during different stages of lifespan, starting from conception to old age. It further discusses the principles of working with human being sand methods of studying human development.
HS-5033	Advanced human development	It's the effect on human health and newer advances in food technology. This course encompasses the physiological, biochemical and social aspects of food and discusses the relationship between metabolites and human health. Moreover, the Course is focused on the advances in the most emerging area of Applied Science of Nutraceuticals (where food is the medicine) and provides a detailed insight into understanding the composition, molecular interaction and bio mechanisms of food metabolites. The knowledge and skills to utilize food and nutrients are as the powerful tools
HS-5035	Advanced food science	for physical, mental and social well-being.

HS-5037	Exceptional children	The course introduces students to various disabilities in childhood years. It highlights aspects such as etiology, characteristics and management of different disabilities. The educational practices in special education and inclusive education are also dealt. It also provides an overview of policies and laws related to disability. It enhances human value and sustainability among students and peoples.
TH-5051	Tribal religious beliefs and practices	The prime ambition to study of tribal religion as manifested in its beliefs and practices. Based on existing literature and data on the subject, it examines how these beliefs and practices contribute to the maintenance of tribal society and the manner in which religion interacts with other institutions in the tribal social structure. It encourages tribal people to enhance their value sustem through proper knowledge.
TU 5052		Enlightenment through Tribal Movies and Tribal Museums' establishes a sense of importance of tribal movies and tribal museums in reflecting culture, custom, tradition and tenets of the tribal people. It helps the students to get first-hand experience to conduct research by visiting museums and watching movies.
TH-5053	Enlightment through tribal movies and tribal museum	It enables the students to integrate theoretical knowledge with practical experience through exposure visits. It helps the students to explore the real world to acquire first-hand knowledge and experience to prepare assignments and projects. This course focusses on summer internship as the part of the course
TH-5081	Internship	curriculum
TH-5083	Students innovative presentation	aims to prepare the students to acquire knowledge and skills to present an assignment. It helps the students enhance their skills of presentation such as: self-confidence, body language, speech modulation, time management and answering the questions raised after the presentation. It enables the students to apply their innovative ideas to use ICT to prepare the content of presentation. It will orient the students with creation, transmission and application of knowledge designed to bring out
HS-5002	Communication in extension education	planned changes in the behavior of people. Communication is an exciting and challenging field of human interaction.
HS-5032	Nutrition Across life span	This investigate show nutrition requirements and challenges change throughout the human lifecycle and how alteration in nutritional requirements impact on human health. The course also investigates the influence of nutrition prior to and during conception and to highlight the importance of good maternal nutrition during pregnancy and lactation and the impact of poor nutritional balance on fetal and infant development and maternal health. The course will cover the assessment of normal growth and body development during childhood and adolescence period.
US 5024		The course introduces students to acquire the knowledge about parenting across life span. It explains about stages of parenthood, types of parenting, parenting roles, and its challenges. It enhances human values and teach them how to adjust with the environment and with their family.
HS-5034	Parenting Across life span	A study of food safety, hygiene and sanitary practices in food industries causes investigation, control of illness caused by food contamination (Hazard Analysis Critical Control Points); and work place safety standards. It teaches human value and sustainability among people and
HS-5036	Food safety and quality control	community basis. The focus of the course is on understanding the importance of early years and early interventions. The course
HS-5038	Early childhood care and education	further aims to familiarize students with indigenous (Indian) models of ECCE, pedagogical approaches and programmatic trends as they evolved in the Indian context. This course focus over the human values and sustainibility.
HS-5082	Field work and Dissertation	The aim of this course is to provide a comprehensive understanding about the need and significance of field visits in preparing dissertation. It helps the students to familiarize with nature and types of research, and the process of preparing a dissertation. It enables the students acquire necessary skills to develop tool, collect data, interpret data to prepare a dissertation.
TH-5052	Education in tribal society- Formal, Informal and Non-formal	. It enables the students to explore government intervention for tribal population both the central and state level and role of formal and non-formal agencies in tribal society. It enables the students to get aware of various schemes and challenges for the prospect of education for the tribals.
3032	Control of the Contro	Community developmen trefers to the broad set of skills and institutions that local communities utilize in an effort to improve the quality of life for all residents. This Course examines the history of housing, economic trends and social policies that have affected the marginalized communities across the country and project the organizing and capacity building measures that community development professionals and activists have

MT- 4006	Probability and Stochastic Process	This course covers topic related to human values and sustainability
MT - 4008	Linear Algebra	This course covers topic related to human values and sustainability
MT-4010	Graph Theory	This course covers topic related to human values and sustainability
MT- 5001	Partial Differential Equations and Transforms	This course covers topic related to human values and sustainability
MT-5003	Numerical Analysis	This course covers topic related to human values and sustainability
MT- 5093 MT-5031	Numerical Analysis(Lab) Functional Analysis	This course covers topic related to human values and sustainability
MT- 5033	Mathematical Methods	This course covers topic related to human values and sustainability This course covers topic related to human values and sustainability
MT- 5035	Optimization Theory	This course covers topic related to human values and sustainability This course covers topic related to human values and sustainability
MT- 5037	Operator Theory	This course covers topic related to human values and sustainability This course covers topic related to human values and sustainability
MT-5039	Number theory and Cryptography	This course covers topic related to human values and sustainability
MT-5002	Analytic Number Theory	This course covers topic related to human values and sustainability This course covers topic related to human values and sustainability
MT-5004	Topology	This course covers topic related to human values and sustainability
MT-5032	Differential Geometry	This course covers topic related to human values and sustainability
MT-5034	Advanced Analysis	This course covers topic related to human values and sustainability
MT-5036	Fluid Dynamics	This course covers topic related to human values and sustainability
MT-5038	Matrix Transformations and Sequence Spaces	This course covers topic related to human values and sustainability
MT-5040	Stochastic Calculus	This course covers topic related to human values and sustainability
MT-5006	Fuzzy sets and their applications	This course covers topic related to human values and sustainability
MT-5008	Data Structure.	This course covers topic related to human values and sustainability
		This Paper certainly picturises Human Values to a grater degree. It further
OD-4001	D. I. OF GIV. W. W.	depicts the impact of enviornment - on Literature during Ancient India. It also
	Prachina Odia Sahitya ra Krama Vikasa	gives us an idea about both the genders without any discrimination.
OD-4003		This paper provides ample evidence of Human Values. Envireonmtal is certainly a key aspect-dialt consciously by the poets and writters of the age. This paper
	Madhya Yugiya Odia Sahitya ra Krama Vikasa	also deals with gender beyond human.
OD 1055	Adhunika Sahityara Krama Vikasa	This Paper deals with human values and morals. It also touches upon gender and
OD-4005	(Swadhinata Purbabarti ebong Parabarti)	environment.
-	Odia Kabya Sahitya (Prachina o Madhya Yuga)	VIII TO THE COURT OF THE COURT
OD-4007	Odia Kabya Sanitya (Frachina o Madnya Yuga)	The course provides subsential amount of human values, moral and ethical. It also delenietes social-economic, cultural and religious environment of that period. It also deals with both the gender with equal estimation.
OD-4009	Odia Gadya Sahitya	This paper is design to incolcate human values, religious temper, environment of the time and gender equality.
TL - 4051	Tribes of India : Culture, Language, Demography	This paper depicts tribal life in India & beyond. It teaches human values to a greater degree. Gender and Environment are some of the key aspects delt in this
	Odia Padya Sahitya	paper with care and concern. This paper is an attempts to infuse human values, imagination, love for nature
OD-4002		and the environment will live in. This also deals with gender sensitivity.
OD-4004	Odia Katha Sahitya	This paper attempts to highlight human values and its practices. It too deliniates the environment, nature, society and gender.
OD-4006	Research Methodology Gabeshana Padhhati	This paper deals with the methodologies of research which in way inculcates human values. Indeed, gender and environment are also delt with utmost care. It too helps researchers for their sustainable academic growth.
OD-4008	Bhasa Tatwa o Bhasha Paribara	This paper deals with the genesis of language and its growth. It also deals with the components like human values, gender and environment.
OD-4010	Odia Nataka o Ekankika	This paper provides adequate human values through art performances on stage. It undoubtedly deals with environment with gender.
TL- 4052	Fiction on the Tribes: Issue of Land, Environment and Justice	This paper depicts Tribal life in India and beyond. It teaches human values to a greater degree. Gender and environment too are some of the important aspects delt in this paper with care and concern.
TL – 4054	Key Socio- Linguistics Concepts for Tribal Literary and Language Studies	This paper dels with socio-Linguistics aspects of Tribal language and literature. It also portrays human values, gender and environment.
OD-5001	Sahitya Tatwa o Samalochana Sahitya	This paper is an attempt to infuse human values, imagination, love for nature and the environment we live in. This also deals with gender sensitivity.
OD-5003	Odia Sahityara Sanskrutika Prustha Bhumi	This paper deals with varieties of subjects like culture, folklore, traditional beliefs and rituals which in way inculcate human values among students. It also discuss human environment of diffurent ages.
OD-5031	Odia Natya Sahitya	This paper throws light on the fundamentals of drama as an art form and teach human values. It further discusses about the socio-political and cultural scenerio of the age.
OD-5033	Adhunika Odia Kabya Dhara	This paper deals with human values to its fullest. It also deleniates the Odia environment and its impact on literature. It further deals with the genders-male and female.
OD- 5035	Rangamancha o Natya Tatwa	This paper deals with dramaturgy sensibility, Human values, Human Environment and Gender also.
OD- 5037	Adhunika Odia Kabya Kabita – I	The Course provides substential amount of human values- moral and ethical it also deleniates the socio-economic, cultural and religious environment of the period. It also deals with both gender with equal estimation.

TL - 5051 World Poetry of the Aboriginals This paper throws light on the Aborbional language and literature of the The paper through its texts teach Human values. It further educates our sabout tribal environment and addresses gender issues. TL - 5053 Theme Based Movies and Tribal Museum Visit Theme Based Movies and Tribal Museum Visit This paper includates adequate human values and deals with gender issue concerns. It further provides opportunities to the students to learn the environment they live in. This paper intends to provide hands on learning to our students. Internst creates opportunities for our students to learn human values in changing environment. TI-5083 Students Innovative Presentation This paper is designed to enhance the the innovative ideas of the students. In aims at giving academic exposer to the students. 321 - 30 4 0	MANAGEMENT DEVELOPMENT & STRESS	Sustainability

HN-4001	Hindi Sahitya ka Itihaas (Prachin kaal ,Bhakti kaal)	This Paper certainly picturises Human Values to a grater degree. It further depicts the impact of enviornment - on Literature during Ancient India. It also gives us an idea about both the genders without any discrimination.
HN-4003	Hindi Sahitya ka Itihas (Riti kaal, Adhunik kaal)	This paper provides ample evidence of Human Values. Envireonmtal is certainly a key aspect-dialt consciously by the poets and writters of the age. This paper also deals with gender beyond human.
HN-4005	Hindi kavya (Prachin kaal, Bhakti kaal)	This Paper deals with human values and morals. It also touches upon gender and environment.
HN-4007	Hindi Kavya (Riti kaal, Adhunik kaal)	This paper will indues human vaules-social, cultural & religious, Environment of the age has also been picturised.
HN-4009	Prayogik Hindi	This course not only touches human values but also encourages students to apply knowledge in various fields fortheir livelihood and sustainability.
HN – 4002	Hindi Upanyas	This paper attempts to highlight human values & its practices. It too deliniates the environment, nature, society and gender.
HN- 4004	Hindi Kahani	This paper is dealing with aspects like Gender, Human values and Environment and Sustainability
HN-4006	Anusandhan Pranali aur Prabidhi	This paper deals with the methodologies of research which in way inculcates human values. Indeed, gender and environment are also delt with utmost care. It too helps researchers for their sustainable academic growth.
HN- 4008	Bharatiya Kavyasastra	This paper deals with the various aspects of poetry. It too deals with human values, Environmant & gander
HN-4010	Paschatya Kavyasastra	This paper deals with human values to a greather degree. It further describes the philosophc, socio-political and economic environment of the world.
HN - 5001	Prayojanmulak Hindi	This paper deals with the genesis of language and its growth. It also deals with the components like gender, human values and environment.
HN- 5003	Hindi Natak Aur Dangmanah	This paper provides adequate human values through art performances on stage. It undoubtedly deals with environment with gender.
TIN- 3003	Hindi Natak Aur Rangmanch Hindi Gadya Vidhayen-I	This paper is loaded with human values. The texts reveal the socio-cultural,
HN - 5031 HN - 5033	(Jivani aur Atmakatha) Asmita vimarsh aur Hindi Sahitya – I	economic and political environment of the period.
IIIV- 3033	(Asmita:Abdharna Aur Sidhhant)	This paper deals with human identity and human values to major extenent. It also highlights the various environments through which the literature of the age emerged.
HN- 5035	Hindi Gadya Vidhayen-II (Samsmaran aur Rekhachitra)	This paper deals with human identity and human values to major extenent. It also highlights the various environments through which the literature of the age emerged.
HN- 5037	Asmita vimarsh aur Hindi Sahitya – II (Stri Asmita aur Hindi Sahitya)	This paper depicts a real picture of the society. Degradation of the human values and quest for values are the matters of discussion in the paper. In addition to this gender issues have been delt with seriousness which is a matter of contention in today's society.
HN - 5002	Bhasa Vigyan ke samanya sidhhant	This paper deals with the genesis of language and its growth. It also deals with the components like gender, Human values and environment.
HN - 5032	Hindi Gadya Vidhayen-III (Nibandh aur Yatra Vritant)	This paper deals with human identity and human values to major extenent. It also highlights the various environments through which the literature of the age emerged.
HN - 5034	Asmita Vimarsh Aur Hindi Sahitya-III (Dalit Asmita aur Hindi Sahitya)	This paper deals with the culture, tradition of the Dalits. Further through the prescribed Dalit text the students will learn the exploitation, discrimination and oppression among different castes of the society. The text will also teach our students moral values, sympathy and empathy. They will also understand the changing environment. Gender issues too is another aspect that the paper deals with.
HN- 5036	Hindi Gadya Vidhayen-IV (Anuvad aur Patrakarita)	The paper attempts to provide an idea about different cultures, tradition and the beliefs through literatures. The propose of introducing Translation is to allow our students to learn literatures of various languages and their literary sensibilities. This paper will certainly induce moral values in to the learner and provide them opportunity to study diverse gender and environmental issues.
HN- 5038	Asmita Vimarsh aur Hindi Sahitya-IV (Adivasi Asmita aur Hindi Sahitya)	This paper deals with the culture, tradition of the Advasi. Further through the prescribed Advasi text the students will learn the exploitation, discrimination and oppression among different castes of the society. The text will also teach our students moral values, sympathy and empathy. They will also understand the changing environment. Gender issues too is another aspect that the paper deals with.
HN - 5040	Prayojanmulak Hindi-II	This paper deals with the genesis of language and its growth. It also deals with the components like gender, human values and environment.

BO-4001	Lower Plants Diversity and Palaeobotany	The Lower Plants collections contain bryophytes (mosses and liverworts), lichens, fungi and algae (including diatoms). These groups represent some of the oldest organisms on earth, and they play important roles in ecosystems as primary producers and as nutrient and water recyclers.Paleobotany is the scientific study of ancient plants, using plant fossils found in sedimentary rocks. These fossils can be impressions or compressions of the plants left on the rock's surface, or "petrified" objects, such as wood, which preserve the original plant material in rocklike form. This subject will create concern about environment and sustainability.
BO-4005	Microbiology and Plant Pathology	Microbiologists in the area of Plant Pathology explore the critical role that disease-causing microbes, including viruses, bacteria, fungi and nematodes play in limiting crop production. Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences for environment and sustainability.
BO-4007	Embryology and Economic botany	Embryology is the study of micro and mega sporogenesis, gametophyte development, fertilization development of endosperm, embryo and seed coats. embryological evidence has been used in solving the taxonomical problems at almost all levels. Economic Botany is the interaction of people with plants. Economic botany is closely related to the field of ethnobotany. Botany is important in the area of economic productivity because it is involved in the study of crops and ideal growing techniques that helps farmers increase crop yield, betterment of environment and sustainability.
BO-4002	Taxonomy of Angiosperms and Resource Conservation	There are four taxonomic fundamental components which simplify the process of identification up to species level. These components are identification , characterization , classification and naming. Plants that produce flowers and bear the seeds and fruits are known as angiosperms. Angiosperms are important for humans as they are the major source of food. They also provide us with spices, textiles, herbs, and pharmaceuticals.
BO-5001	Genetics, Evolution and Plant breeding	Plant breeding, is the application of genetic principles to produce plants that are more useful to humans. This is accomplished by selecting plants found to be economically or aesthetically desirable, first by controlling the mating of selected individuals, and then by selecting certain individuals among the progeny by changing their gene characteristics. This subject helps in understanding the evolution process for sustainability in the environment.
BO-5031	Plant Ecology and Phytogeography	Plant ecology is a sub-discipline of ecology focussed on the distribution and abundance of plants, and their interactions with the biotic and abiotic environment. Phytogeography or plant geography deals with the geographical distribution of plants on earth. Phytogeography is the study of the distribution of plants or taxonomic groups of plants and its focus is to explain the ranges of plants in terms of their origin, dispersal, and evolution.
BO-5035	Floriculture	Floriculture or flower farming is the study of growing and marketing flowers and foliage plants. Floriculture includes cultivation of flowering and ornamental plants for direct sale or for use as raw materials in cosmetic and perfume industry and in the pharmaceutical sector.
BO-5037	Natural Resource Management	Natural resource management (NRM) refers to the utilization of natural resources such as land, water, air, minerals, forests, fisheries, and wild flora and fauna. The study includes micro-watershed management, irrigation water management, soil and water conservation, community forestry, community-based coastal zone fisheries management, and conservation of biodiversity for environment, sustainability and human values
ZO-4001	Animal Diversity and Taxonomy	The animal world is large and diversified based on its members' shape, size, eating habit, habitat, method of reproduction. Animals show variations in their anatomy, physiology, and genetic features. Based on those differences, they are put into different categories. The ranks have been used to describe and understand major animal groups for a long time, and many people are taught about animal natural history through these traditional ranks. The study of this subject helps
ZO-4005	Ecology and Wildlife	in environment and sustainability. Ecology is the study of earth systems and is integral in wildlife conservation. Wildlife conservation encompasses all human activities and efforts directed to preserve wild animal from extinction.
ZO-4007	Animal Physiology and Biochemistry	Physiology is the branch of biology that deals with the normal functions of living organisms and their parts. Biochemistry is the branch of science which is concerned with the chemical and physicochemical processes that occur within living organisms. This study will help in environment and sustainability.
ZO-4002	Microbiology and Molecular Biology	Microbiology is the hands-on study of bacteria, viruses, fungi and algae and their many relationships to humans, animals, plants and the environment. Cell and molecular biology bridges the fields of chemistry, biochemistry and biology as it seeks to understand life and cellular processes at the molecular level for upgrading environment and sustainability.
ZO-5001	Animal Development and Neurobiology	Neurobiology aims to explain animal behaviour from the processing of sensory information to the generation of motor outputs and how it is shaped by the environment and sustainability,gender, human values.
ZO-5031	Economic Zoology	The science of applying zoological aspects for the welfare of mankind is economic zoology. The practices involved in this are inclusive of culturing animals to mass-produce them for the consumption of humans and also to exterminate those animals that are harmful to mankind either indirectly or directly for environment, and their sustainability for economic growth.
ZO-5035	Conservation Biology	Conservation biology is the study of the conservation of nature and of Earth's biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and the erosion of biotic interactions in environment and generating human values.
ZO-5037	Parasitology and Toxicology	Parasitology is the study of parasites, their hosts, and the relationship between them. As a biological discipline, the scope of parasitology is not determined by the organism or environment, but by their way of life sustainability. The main practical objectives of evolutionary parasitology include the development of therapeutic and preventive measures to prevent increase in virulence and resistance in parasites or even help reduce them.
ZO-5002	Animal Behaviour and Chronobiology	Chronobiology is the scientific field that studies these rhythms; how they work, how they are regulated, how persistent they are, what happens when they are disturbed, how they contribute to health and disease, which behaviors are subjected to them, and their environment and sustainability, for human values.
ZO-5034	Fisheries and aquaculture	Aquaculture is also called "fish farming," and it involves the natural or controlled cultivation of shellfish, fish, and seaweed in freshwater and marine environments. Fisheries are solely related to catching wild fish or raising and harvesting fish through aquaculture or fish farming for environment, sustainability and human values.
ZO-5036	Medical Diagnostics	Medical Diagnostics major studies a wide range of disease processes and patient diagnostic patterns, and applies this information to patient case studies in order to evaluate hematological, microbiological and biochemical disease states. The primary purpose of diagnostic testing is to detect a disease, its outlook, and its spread throughout the body. Diagnostic tests are used widely over the world with the primary purpose of detection of disease, its outlook, and its spread in the body, effect on environment and sustainability, gender, human values.

FS- 4001	Concepts of Food and Nutrition	Food Science allows us to make the best use of our food resources and minimize waste. Food materials are of biological origin. How they behave in harvesting, processing, distribution, storage and preparation is a complex thing. Full awareness of all important aspects of the food deals with human life sustainability.
FS- 4003	Food Biochemistry	Food biochemistry is the production of energy from the breakdown of food in the cell. Nutrients are used by the cell to create energy, and vitamins and minerals are also essential for proper metabolic processes. The nutrients like carbohydrates, lipids, and proteins are essential for human life.
FS- 4005	Food Microbiology	Microbiology is used in many aspects of daily life, including food production, biodegradation, the manufacture of commercial goods and genetic engineering. They are required in a variety of dishes. Microorganisms, for instance, are required for the environment and sustainability.
CI-4051	Ethno Medicinal System	Medicinal and aromatic plants constitute an important part of the natural environment and agro- ecosystems , and contain a wealth of chemical compounds known as secondary metabolites and including alkaloids, glycosides, essential oils and other miscellaneous active substances and required for human lifeline.
FS- 4004	Biotechnology, Instrumentation and Biostatistics	Biotechnology is an integrated field of science that includes numerous applications in food system. Biotechnological processing uses enzymes and microorganisms to produce products that are useful to a broad range of industrial sectors, including chemical and pharmaceutical, human and animal nutrition, pulp and paper, textiles, energy, materials and polymers, using renewable raw materials. Biostatisticians play a unique role in safeguarding public health and improving lives through quantitative research. By combining across quantitative disciplines, biostatisticians are able to collaborate with other biomedical researchers to identify and solve problems that pose threats to health and to quality of life.
FS- 4006	Beverages and Snacks Technology	Beverages are not only provide essential hydration but can also be a source of other nutrients. It can be an energy drink, some beverages can be a source of vitamins and minerals, protein and other carbohydrates. The food and beverage industry coordinates with farm producers with the food value chain to provide the product quality that consumers demand and sustainability.
CI-4052	Tribal Livelihood and Horticulture	To give comprehensive support for people belonging to various tribes in the entire range of production, product development, preservation of traditional heritage , support to both forest and agricultural produce of tribal people , support to Institutions to carry the above activities, provisions of better infrastructure, helps
CI-4054	Health and Nutritional issues in tribal communities	to create more job opportunity for production of more profit value. Unsanitary conditions, ignorance, lack of personal hygiene and health education are the main causal factors for prevalence of health problems among tribes. This subject refers to the phenomenon through which different groups in a healthcare setting strictly adhere to their profession.
FS - 5001	Food Quality	The term food quality represents the sum of all properties and attributes of a food item that are acceptable to the customer. These food quality attributes include appearance, including size, shape, gloss, colour, consistency, texture, flavour, and nutritional content thit is essential basic demand for life sustainability.
FS - 5003	Food Processing and Preservation: An Insight	A good method of food preservation is one that slows down or prevents altogether the action of the agents of spoilage. Also, during the process of food preservation, the food should not be damaged. In order to achieve this, certain basic methods were applied on different types of foods that prevents in generating wastes and presenting more value added products for sustainability.
FS-5037	Nutrition and Health	People with healthy eating patterns live longer and are at lower risk for serious health problems. For people with chronic diseases, healthy eating pattern can help to manage these conditions and prevent complications. These topics will comply the scope of balanced diet for different stages of life.
CI-5051	Strategies for Economic Empowerment of Tribal Community	The tribal economy is mainly concentrated around the collection and processing of Minor Forest Products and cultivation largely for the purpose of domestic consumption and their economic development.
CI-5053	Sustainable Utilization and Management of Tribal Resources	To understand the Socio-Ecological System and intervene to enhance the competency of the community and build the social, natural and financial capital to pursue livelihood, food security and well-being which leads to improve the Human Development.
CI-5081	Internship	The course will help to appreciate that information, knowledge, and technology are always evolving, think independently to solve problems. Explain the skills necessary to continually educate oneself. Participate in ongoing, voluntary and self-motivated pursuits that supplement food science knowledge.
FS-5002	Innovative food Packaging	The primary purpose of packaging is to protect its contents from any damage that could happen during transport, handling and storage. Packaging retains the product intact throughout its logistics chain from manufacturer to the end user. It protects the product from humidity, light, heat and other external factors. Some of the eco-friendly/bio-degradable/recyclable food packaging prevent pollution for environment.
FS-5082	Dissertation	To undertake research in an area related to the program of study. The student shall be capable of identifying a problem related to the program of study and carry out wholesome research on it leading to findings which will facilitate development of a new/improved product, process for the benefit of the society . Engage in collaborative learning, Facilitate group projects, Demonstrate the ability to work independently, as well as the ability to work cooperatively in teams. Provide leadership in a variety of situations with sensitivity to diverse backgrounds.
FS-5032	Technology of cereals, pulses and oil seeds	In addition to supplying starch and protein, the cereals serve as a rich source of dietary fiber and nutrients. Research has documented the important contribution of wheat and other millets to healthy diets, linking the crop to reduced risk of type 2 diabetes, cardiovascular disease, and colorectal cancer. It will help to make value added productsfor betterment of human life.
FS-5034	Bakery and confectionary Technology	This course describes about the baking and principles of bakery and confectionery products. To exhibit the use of sanitation and safety practices in bakery production. To develop an understanding of process technology of bakery products for better employability. Through this course the students shall acquire adequate knowledge of structure, nutrient composition and processing of various cereals particularly those which are used in bakery industry, milling of wheat, physico-chemical and functional properties of cereals, role and storage of ingredients used in baking, types and grades of flour, baked products prepared by hard and soft wheat, viz., bread, cakes, crackers, cookies, wafers etc, losses in baking, quality evaluation, standards, packaging and sale of bakery products, and prospects and problems of bakery industry.
FS-5036	Post harvest management of fruits and vegetables	This course aims in providing knowledge about the fruit and vegetable structure, post-harvest physiology and its spoilage. To understand the concepts of physiological characteristics of fruits and vegetables. To provide an insight about fruit losses during storage and ways to prevent it. To Gain knowledge about spoilage of fruit and vegetable as well as prevention steps for healthy environment.

FS-5038	Nutrition and Disease	A therapeutic diet is a meal plan that controls the intake of certain foods or nutrients. It is part of the treatment of a medical condition and are normally prescribed by a physician and planned by a dietician. A therapeutic diet is usually a modification of a regular diet. The nutrients and their types in dairy products are involved with bone health, and other conditions. Calcium, vitamin D, phosphorus and the high potassium content of dairy foods can help lowering the diseases and boost up our health development.
CI-5054	Open Elective (Basic Biology)	This course describes about the diversity of diseases and the special features of body mechanism. The course imparts knowledge of ecology. To describe the characteristics of different groups of cells with their adaptive processes and specific features in diversified habitats, enabling understanding and research skill on a diverse range of genetics and genetic engineering. A student will be able to understand the levels of organization and related functions in plants and animals. Identify the characteristics and basic needs of living organisms. Explain the processes of growth and development in individuals and populations. Describe the relationships between organisms and environment.
